Abstract/Outline

Guided by China's national innovation strategy, Shacman, a leader enterprise in Northwest heavy-duty truck manufacturing, has actively yearned to and embraced technological innovation. Going along with principles issued by China's president Xi as the kernel entrepreneurial spirit, Shacman regards innovation as key to its growth, consistently boosting technological investments.

The company has significantly improved its independent innovation by refining its R&D strategies, tackling key technical challenges, and launching major new product initiatives. By leveraging technology to empower new quality productive forces, Shaanqi is fully committed to embarking on a new journey of high-quality enterprise development.
